## PROFESSIONAL SUMMARY

---

Final-year Computer Science student with experience building AI-powered applications using LangChain, Qdrant, React, and Docker. Built a multilingual RAG system during a summer internship at IIT Ropar and hold the AWS Certified Solutions Architect – Associate certification.

## EDUCATION

---

|                                            |               |
|--------------------------------------------|---------------|
| <b>VIT Bhopal University</b>               | 2023 – 2027   |
| B.Tech in Computer Science and Engineering | CGPA: 8.10    |
| <b>St. Xavier's Sr. Sec. Co-Ed School</b>  | Class X & XII |

## EXPERIENCE

---

**Summer Intern — Indian Institute of Technology Ropar** May 2026 – Jul 2026  
*Guided by Dr. Balwinder Sodhi, Department of CSE*

- Engineered Talk2Books (TTB), a privacy-first multilingual RAG document Q&A system end-to-end as a contributor to Dr. Sodhi's GitHub repo ([sb7r/ttb](#)), using LangChain, Qdrant, and Ollama phi4-mini.
- Built a 768-dim semantic search pipeline (sentence-transformers + Dockerised Qdrant) and a full-stack interface with async Quart REST API, React + Vite frontend, and langdetect multilingual routing.

## TECHNICAL SKILLS

---

|                        |                                                                      |
|------------------------|----------------------------------------------------------------------|
| <b>Languages</b>       | Python, Java, C++, JavaScript, SQL                                   |
| <b>AI Engineering</b>  | LangChain, Qdrant, Ollama, RAG, Vector Search, sentence-transformers |
| <b>ML / Data</b>       | Scikit-learn, Pandas, NumPy                                          |
| <b>Web &amp; Tools</b> | React, Vite, Vue.js, Quart, HTML, CSS, Git, Docker, Linux            |
| <b>Cloud</b>           | AWS (Solutions Architect – Associate), EC2, S3, IAM, VPC             |

## PROJECTS

---

**Web-Based Arduino Simulator** *Tech: JavaScript, HTML, CSS, C++*

- Simplified circuit prototyping by engineering digital and analog I/O simulation logic with auto-wiring in JavaScript, eliminating manual wiring steps for end users.
- Bridged simulation to real hardware by implementing C++ code generation from live circuit state, enabling direct export of outputs to physical Arduino sketches.

**Crop Recommendation and Price Prediction System** *Tech: Python, Scikit-learn, JavaScript*

- Delivered end-to-end crop advisory functionality by integrating Random Forest model predictions into the application pipeline, enabling data-driven recommendations for farmers.

## CERTIFICATIONS

---

AWS Certified Solutions Architect – Associate (SAA-C03) (Jun 2026 – Jun 2029) · NPTEL – Machine Learning · Google AI Essentials
